

FAQ's

1. What is BarterBuild?

BarterBuild is a specialized B2B platform designed to connect real estate builders with material suppliers through barter exchanges. Instead of cash transactions, users trade goods, services, or materials directly. BarterBuild's role is limited to facilitating introductions—we provide verified contacts via our token system, but all negotiations and deals happen off-platform between the parties.

2. How does the barter system work on BarterBuild?

Users browse profiles and listings of builders (seeking materials) and suppliers (offering materials like cement, steel, and many others). By redeeming tokens, you unlock contact details for potential matches. Once connected, you negotiate barter terms (e.g., Flats for raw materials) independently. BarterBuild does not handle payments, contracts, or logistics—it's purely an introduction service.

3. What are tokens, and how do I acquire them?

Tokens are the platform's virtual currency used exclusively to access contacts and introductions. You can purchase token packs starting from our packages or by adding additional tokens to your existing package. Tokens do not expire and are non-refundable. Tokens cannot be used if the annual package expires but it can be carry forwarded if the same annual package is renewed or an upgraded package is taken.

4. How do I redeem tokens on the platform?

Browse search results or profiles filtered by location, material type, or project needs. For each promising match, select "Request Contact" and redeem the mentioned tokens. You'll instantly receive the user's email, phone, and basic details. Track your token balance in your dashboard.

5. What information do I get after spending tokens?

Upon token spend, you receive: verified contact details (email and phone), a complete brief of the company profile summary. No sensitive financial data is shared.

6. Are there any fees for completing barter deals?

No, BarterBuild charges nothing for deals, negotiations, or trades. Only purchase and redemption of tokens on Barterbuild platform. This keeps the platform focused on value exchange without middleman costs.

7. Who is eligible to join BarterBuild?

The platform is open to verified real estate builders (Residential and Commercial) and material suppliers (e.g., cement, steel, and many others). Individuals or unrelated businesses are not eligible.

8. How does user verification work?

All profiles undergo manual review within 48-72 hours of signup and package purchase. We check business documents, and industry related documents as mentioned in a simple procedure. Unverified profiles are hidden from the website until the profile is complete to ensure quality matches.

9. What are the benefits of using BarterBuild over traditional marketplaces?

- Cash Flow/Cost Savings: Eliminate cash outlays by bartering surplus inventory or services.
- Targeted Matches: AI-driven suggestions based on real estate needs
- Efficiency: Quick introductions without endless emails—redeem tokens only on high-potential leads.
- Traditional sites often involve fees and cash-only deals; we focus purely on barter.

12. How can I get support or report an issue?

Contact our team 24/7 via the in-app chat, email _____@barterbuild.com), or phone (+_____). For urgent verification or dispute escalations, use the dashboard's "Help" section.

13. Can I upgrade my profile for better visibility?

Yes! Profiles can be upgraded with purchasing the higher package by paying the difference amount and the additional benefits of the higher package will be added in the profile.

14. What is RB and UCB and what are the general discount rate compared to market standards?

RB is Ready Barter which generally offers a 5-10% discount compared to market rate and UCB is Under Construction Barter which generally offers 10-20% discount compared to market rate.
